

California Health Centers

Community health centers (CHCs) provide comprehensive, high-quality primary and preventive care and reduce overall costs for the health care system. CHCs depend primarily on Medicaid and federal grant funding to operate.

Proposals to cap federal matching or end Medicaid expansions are a major threat to CHCs, their patients, and health systems in the communities they serve.

5.4 million
CHC patients

California's CHC patients are from varied populations, including more than:

- 1.6 million children birth to age 18
- 3.2 million adults ages 18 to 64
- 590,000 older adults age 65+

3.7 million
CHC patients
in Medicaid

- 1.4 million children in Medicaid
- 2.3 million adults 18 to 64 in Medicaid
